

* THE MAGIC BOX FOR GRILLSTICKS

With interchangeable forming Alate sets for SHISH **KEBABS**, **PORK LOLLIPOPS**, **KOFTA KEBABS**, **SATAY** and **JUMBO GRILLSTICKS**.

Equipment: Model 20 - Supplied with one forming Alate set 20 holes of 20mm diameter. Recommended weights 60-120g (2-4oz)
 Model 12 - Supplied with one forming Alate set 12 holes of 20mm diameter. Recommended weights 60-120g (2-4oz)

Method: Will form any minced and seasoned meat onto skewers. Select the meat to be used, mince twice, add seasoning, mix together and mince again. Calculate the amount of meat mixture required by multiplying the number of holes in the forming Alate by the weight per skewer, e.g. 12 holes x 60g = 720g. Place the meat into the outer box and press down to remove any air. Place on top of inner box. Push the skewers through the centre of the meat mixture, allowing them to pass through the plastic skewer guide by 25mm (1"). Press down firmly on the handles to extrude the meat through the forming Alate. Remove by pulling up and away from the top of the box. Roll in decorative coating and display for sale.
